BRAND STORY SVAVO

SVAVO was founded in 2003 in Shenzhen, China. With the strategic positioning of "based in China, eyeing the global market," SVAVO is an innovative enterprise that integrates industrial design, software and hardware system development, precision manufacturing, sales, and service.

By providing IoT sensor hardware infrastructure and leveraging big data platforms to construct various data models, SVAVO offers intelligent analysis and intelligent management scientific operation and maintenance services for social digital infrastructure. This meets customers' needs for efficient, convenient, and energy-saving hygiene solutions.

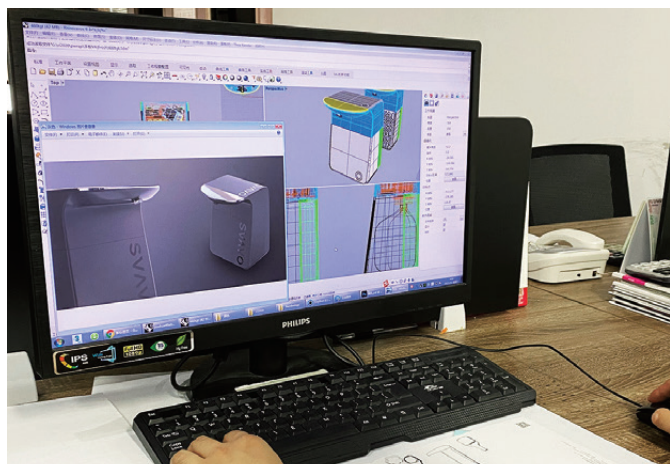

We will focus on the theme of intelligent cleanliness, health, and sustainability to construct an intelligent, low-carbon, and healthy ecosystem. Our goal is to help prevent the spread of germs, promote environmental awareness, and provide high-quality living standards for humanity.

PRECISION MANUFACTURING

The SVAVO production base covers multiple departments including injection molding, assembly, quality control, and warehousing. We engage in engineering structure research and development, software and hardware development, and precision mold production. Equipped with various advanced production facilities for injection molding and assembly, we strictly adhere to the GB/T19001-2016, ISO9001:2015 quality management system, and 3C standards to control the entire production process. We always prioritize market and customer needs, continuously refining our product craftsmanship to meet users' pursuit of a better quality of life.

ENTERPRISE HONORS

SVAVO owns 175 patents, including 5 authorized inventions, 20 utility model patents and 150 design patents. Additionally, the company holds 128 registered trademarks and 4 copyrights. SVAVO has also obtained ISO9001 quality certification, national high-tech enterprise certification, and BSCI certification.

SMART RESTROOM PART 2 Solution

Taking the toilet revolution as an opportunity and leveraging the development of the Internet of Things, we provide intelligent software for urban public toilets. Through smart toilets, users can easily locate nearby public toilets operated by environmental sanitation authorities or enterprises. After using the facilities, users can provide feedback, suggestions or complaints about the toilets. Meanwhile, management personnel can digitally manage the toilets through the platform, monitoring the supply of consumables in real-time, allocating human resources efficiently, addressing complaints and improvement suggestions promptly, thereby enhancing management efficiency and reducing operational costs.

MANAGEMENT CHALLENGES RESTROOM

Many Customer Complaints, Poor Experience

Frequent Paper and Liquid Shortages,
Untimely Cleaning Service,
Lack of Complaint Feedback Channel.

Serious Waste of Consumables

Unable to control consumable usage,
difficult to track consumable data,
increased consumable costs.

Difficult to Manage

Relies on manual inspections,
narrow coverage, repetitive and
easily overlooked cleaning/maintenance tasks,
difficult to control, high operating costs.

Low Toilet Occupancy Rate

Lack of Data Management,
No Transmission of Toilet Information,
Unreasonable Allocation.

SMART RESTROOM

Seizing the opportunity of the toilet revolution and focusing on the new trend of Internet of Things development, we provide intelligent cleaning services for urban public toilets. Through the SVAVO Smart Restroom, users can easily locate open restrooms and view space details anytime, anywhere. With intelligent stall guidance, users can provide feedback, suggestions, or complaints about the public toilets. Meanwhile, management personnel conduct digital management of public toilets through the platform, monitoring the replenishment of consumables in real-time, allocating human resources reasonably, addressing complaints and improvement suggestions promptly, thereby enhancing management efficiency and reducing operational costs.

Remote Device Management

Wireless Networking,
Mobile Office,
Convenient and Efficient.

Drive Cost Reduction and Efficiency Improvement

One-click work order retrieval,
farewell to omissions zero delay in equipment status,
one cleaner manages one building.

Achieving Predictive Operations

Grasp consumable usage data firsthand,
intelligently analyze tissue consumption frequency,
and assist managers in making scientific decisions.

Enhance User Experience

Finding toilets with your phone is so easy,
bid farewell to worries about paper and liquid shortages,
and provide feedback on complaints and suggestions with just one click.

SVAVO ReiCloud

Butler (PC + Mini Program)

keep a low profile, grasping the overall situation

The Butler system is an intelligent management system based on public sanitation scenarios. It combines intelligent cleaning products to achieve real-time perception of restroom consumables, air quality, and toilet stall statuses. It drives operations with data to achieve cost reduction and efficiency improvement objectives.

Through the Butler system, managers and cleaners can perform comprehensive real-time management mobile office tasks, online maintenance, data viewing, work order assignments, and event feedback handling, all accessible through the WeChat mini-program mobile platform.

Digital Consumable Management

Cost Reduction and Efficiency Improvement, Saving is King

With the goal of fine management of consumables, details such as tissue, hand soap, and electricity levels can be monitored at any time through device monitoring. Data can be intelligently analyzed in the cloud, and real-time alerts can be pushed for paper and liquid shortages, reducing the frequency of manual inspections and improving the responsiveness of cleaning services and user experience.

Smart Toilet Paper Holder PD-065

Tissue Monitoring | Paper Shortage Alert | Data Reporting

Voltage: 6V

Communication Protocol: LoRa

Dimensions: L293*W136*H298mm

By monitoring the usage status of toilet stalls and displaying indicators for occupied or vacant stalls, individuals can be quickly directed to unoccupied stalls, thus alleviating restroom congestion. Additionally, emergency alarm devices can be provided to ensure the safety of restroom users.

Self-Powered Door Lock DD-001

Occupancy Monitoring | Occupancy Notification | Data Reporting

Model: S-SD-FK-DD-001-0

Power Supply: Self-powered

Communication Method: FSK

Product Dimensions: L85.5*W76*H68mm

Human Body Sensor BS-001

Occupancy Notification | Customer Flow Statistics | Data Reporting

Model: S-SD-FK-BS-001-9

Detection Methods: 5.8G Microwave Radar, Infrared Sensing

Power Supply: 4 x Size 5 Alkaline Batteries

Communication Method: FSK

Product Dimensions: L70*W29*H85mm

Toilet Stall Indicator Light TL-001

Occupancy Notification | Customer Traffic Statistics | Data Reporting

Model: S-DT-FK-TL-001-9

Power Supply: 100-240VAC 50/60Hz

Communication Method: FSK

Product Dimensions: L50*W51*H304mm

Smart Environmental Monitoring

Excellent Aroma, Clean and Refreshing

Based on monitoring various indicators of the bathroom air environment, starting from this point, by using environmental sensors to perceive and coordinate with air purification equipment, the aim is to maintain normal bathroom air indicators at all times, reduce bathroom odors and bacterial growth, enhance user experience, and safeguard health.

Smart Aroma Diffuser Bluetooth Edition

Automatic Spraying | Scheduled Operation | Remote Control

Model: S-AC-BT-AD-090-9/0

Operating Voltage: DC1.5V

Atomization Volume: 0.01-0.02ml/time

Atomization Frequency: ≥5000 times/can

Power Supply: 45# Alkaline Batteries Type-C 5.0V

Product Dimensions: L168*W65*H168mm

Five-in-One Environmental Sensor ES-001

Temperature | Humidity | PM2.5 | Ammonia | Hydrogen Sulfide

Model: S-SD-FK-ES-001-9

Material: ABS

Power Supply: 100-240VAC 50/60Hz

Communication Method: FSK

Product Dimensions: L80*W80*H63mm

Gateway DT-001

Data Collection | Data Reporting

Model: S-DT-FK-DT-001-0

Power Supply: 100-240VAC 50/60Hz

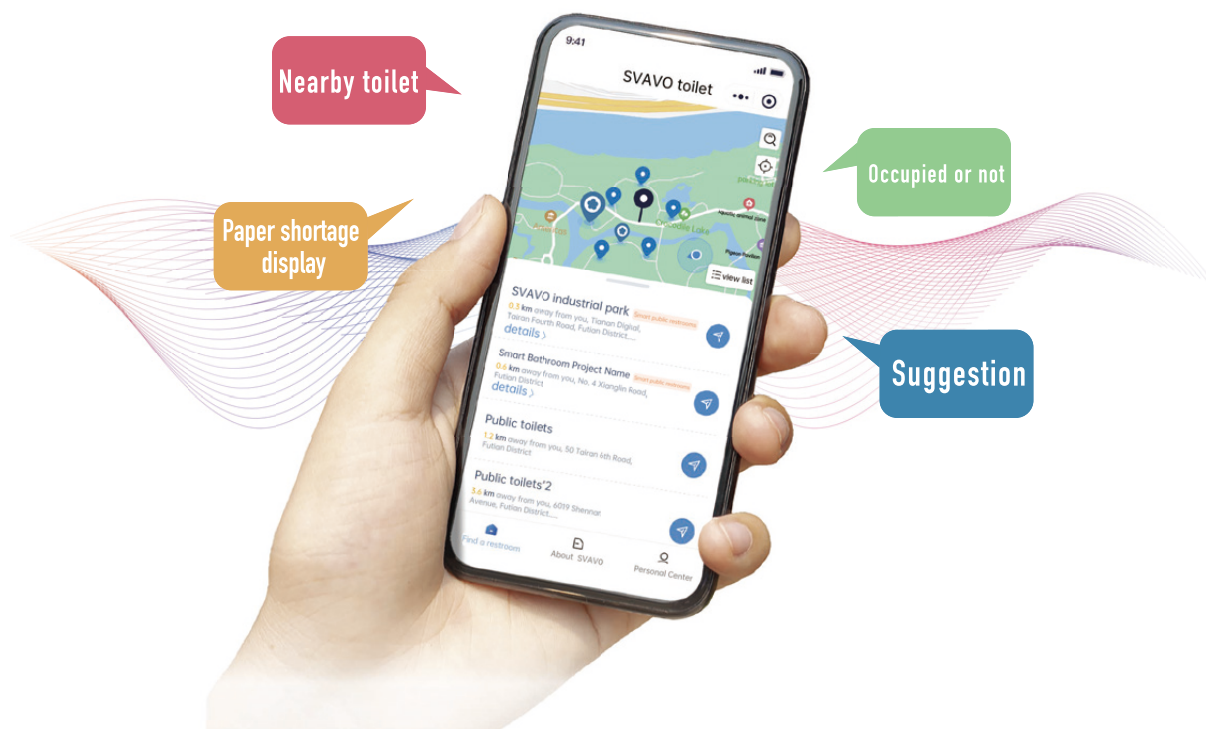

Communication Method: FSK/NB-IoT

Product Dimensions: L80*W80*H63mm

Restroom(Mini Program)

No need to queue, your phone helps you find restrooms.

Accurate positioning of the area, scan the QR code on WeChat to check the occupancy status of restrooms.

Digital Screen

Information Overview, Dynamic Monitoring

The digital screen collects various data from smart hardware, undergoes intelligent analysis through the steward system, and presents it in a visual way on the screen; achieving real-time synchronization to display the real-time status of the restroom.

The SVAVO logo is displayed in white, bold, sans-serif capital letters on a dark blue rectangular background. The background of the entire page is a photograph of a modern, brightly lit nursing room. The room features light green walls with large, stylized, colorful murals of clouds, trees, and flowers. In the foreground, there is a long, light-colored wooden counter with a white trash bin underneath. On the counter, there are two white SVAVO baby changing stations with integrated sinks and mirrors. To the right, there is a white SVAVO baby diaper disposal bin. The floor is a light gray, and there are some yellow chairs visible in the bottom right corner.

NURSING ROOM PART 2 Solution

Let Love and Care Have a Better Start...

SVAVO continues to pay attention to the travel needs of the mother and baby population. Thoughtfully creating warm and comfortable high-quality mother and baby spaces. Promoting freedom for breastfeeding in public spaces. Building a social atmosphere of loving infants and mothers, escorting mothers and babies for outings.

BREASTFEEDING

Breastfeeding can enhance the immunity of infants and young children and give mothers stronger recovery abilities. The World Alliance for Breastfeeding Action (WABA) designates August 1st to 7th each year as "World Breastfeeding Week," encouraging and supporting breastfeeding throughout society.

The "Breastfeeding Promotion Action Plan (2021-2025)" jointly formulated by 15 departments including the National Health Commission stipulates that by 2025, the coverage rate of public breastfeeding facilities should reach over 80%. All employers required to provide breastfeeding facilities should have established standardized mother and baby facilities.

SVAVO continues to pay attention to the travel needs of the mother and baby population, thoughtfully creating SVAVO mother and baby spaces, promoting freedom for breastfeeding in public spaces and fostering a social atmosphere of loving infants and mothers.

NURSING ROOM

As a private space designed for parents to conveniently care for, breastfeed, pump, feed, and prepare meals for their infants while away from home, it is essential infrastructure that all public places accommodating mothers and babies should have. It serves as the most effective solution to breastfeeding challenges in public spaces during the lactation period and is a significant indicator of modern civilized cities' humanistic care.

SVAVO continues to pay attention to the travel needs of the mother and baby population, and has launched baby changing stations and baby seats to accompany mothers and babies when they go out.

SVAVO

INTELLIGENT PAPER DISPENSING SYSTEM PART 2 Solution

Responding to the call of the "Toilet Revolution" to empower the construction of smart cities.

The SVAVO Intelligent Paper Dispenser is a commercial public smart paper-saving device that supports multiple modes including facial recognition, QR code scanning, and sensor-based dispensing. Leveraging technologies such as big data, artificial intelligence, and the Internet of Things (IoT), it provides scheduled and quantified paper dispensing services to the community.

Adjusting paper length, quantity, and frequency in the backend effectively addresses paper wastage issues and guides people to develop good paper-saving habits.

Intelligent Paper Dispenser PRO-19AP71 (TOILET PAPER)

Operating Modes: Facial Recognition + QR Code Scanning + Sensor

Screen Size: 15.6 inches

Resolution: 1920*1080

Overall Dimensions: L303*W192.5*H453mm

Average Power Consumption: 36W

Connectivity: Wired Network Interface, WiFi, 4G Network

Consumables: Independent Sealed Jumbo Roll Paper (Three Ply) V-SD800C

Intelligent Paper Towel Dispenser Advertising Machine PRO-19AP70 (HAND TOWEL PAPER)

Operating Modes: Facial Recognition + QR Code Scanning + Sensor

Screen Size: 17.3 inches

Resolution: 1920*1080

Overall Dimensions: L320*W230*H490mm

Average Power Consumption: 48W

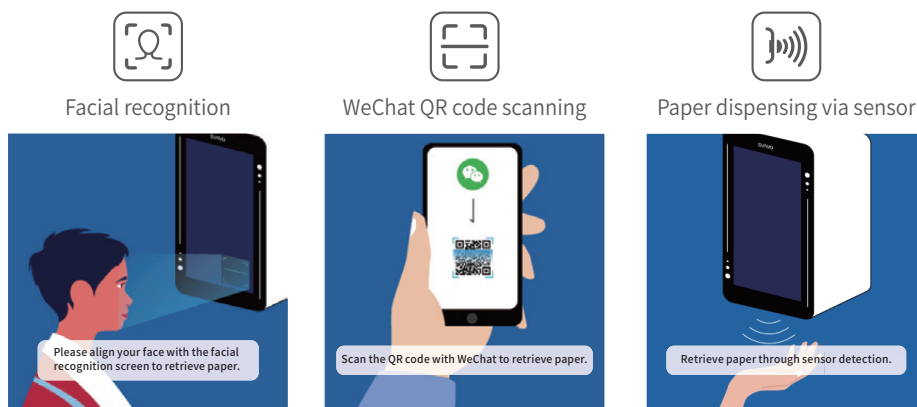

Connectivity: Wired Network Interface, WiFi, 4G Network

Consumables: Roll Hand Towel Paper V-SJ1300

PRODUCT FEATURES

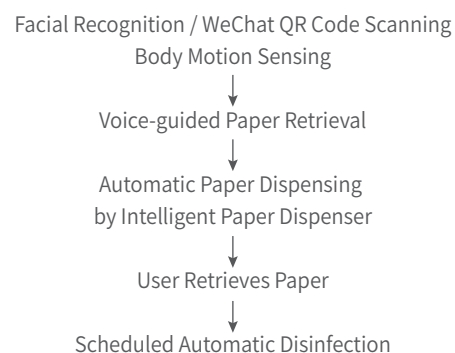

Three intelligent paper dispensing modes - Switchable on demand

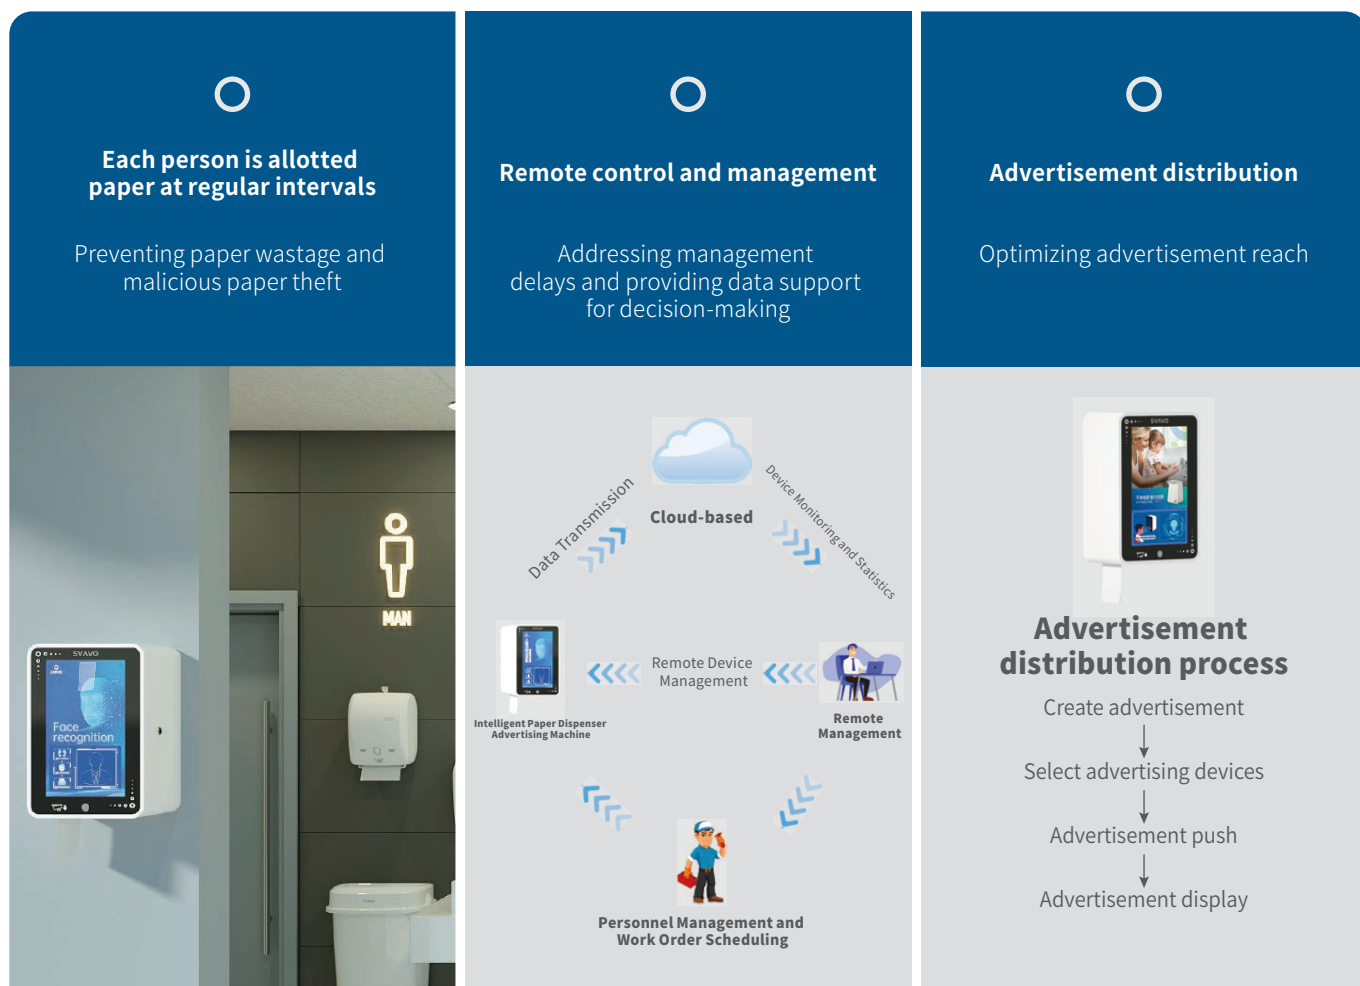

Note: The facial recognition paper dispenser does not collect facial information. It only recognizes facial features for a short period (does not store or upload images) to allocate paper, avoiding waste behavior while protecting user privacy.

Intelligent Paper Retrieval Process

The core value of the intelligent paper towel dispenser advertising machine

Recommended Usage Scenarios

Tourist attractions

Sanitary public toilets

Medical institutions

Commercial centers

Transportation hubs

Business buildings

Save paper, protect the ecosystem
Optimize management, improve experience
Reduce costs, enhance benefits

A photograph of a modern public restroom with a blue overlay. The restroom features a row of white urinals, a white paper towel dispenser, and a white trash bin. The walls are made of light-colored stone tiles, and the floor is also covered in similar tiles. The ceiling has recessed circular lights. The blue overlay is positioned on the left side of the image, containing the SVAVO logo and the title 'INTELLIGENT TOUCHLESS TOILET PART 2 Solution'. Below the title is a paragraph of text and a quote from the World Health Organization.

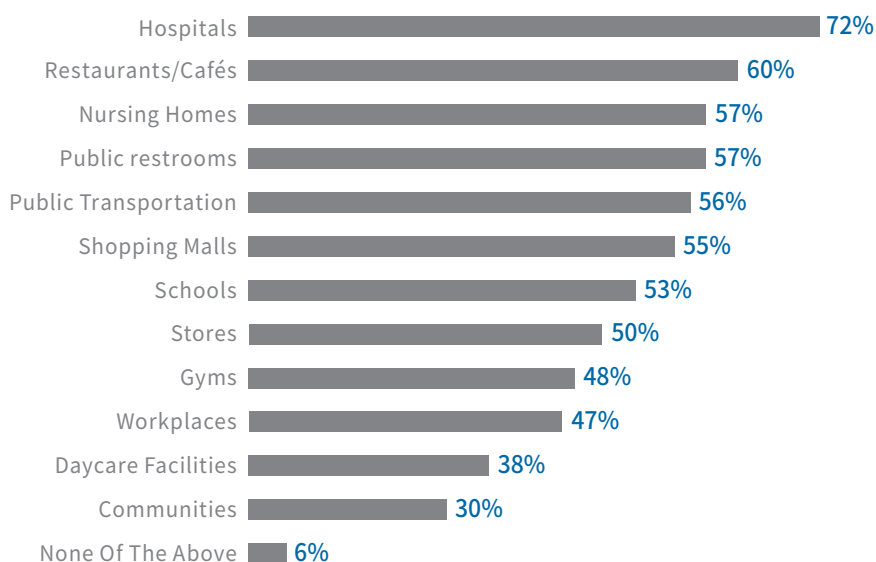

SVAVO

INTELLIGENT TOUCHLESS TOILET PART 2 Solution

The widespread outbreak of the influenza virus has prompted people to re-examine the safety of public hygiene spaces and become extremely sensitive to hygiene issues. Clean and tidy restrooms are crucial indicators for promoting the equalization of public services in the Toilet Revolution, as well as key factors in improving the business environment, increasing customer flow, and enhancing services in commercial complexes. To effectively prevent cross-infections and alleviate public concerns about hygiene safety, SVAVO has proposed a public hygiene solution - the intelligent touchless restroom. This solution aims to achieve efficient and convenient experiences in public spaces while reducing costs and increasing efficiency.

(According to a 2012 survey by the World Health Organization, "For every additional \$1.00 invested in sanitation facilities, there is a return of \$5.50 in reduced medical costs, increased productivity, and decreased mortality rates.")

RESTROOM OBSERVATION

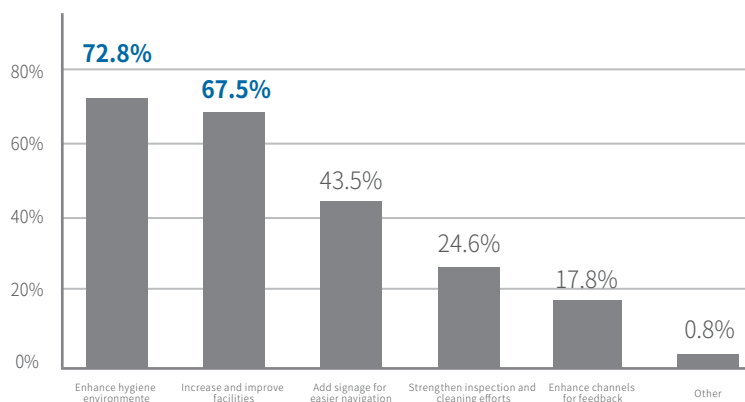

72% Hospitals

The public has high expectations for government-led efforts to improve public hygiene standards.

*The ESSITY 2020-2021 Basic Elements Initiative Survey Results

2021 Survey on Factors Contributing to the Improvement of Public Restroom Service Quality for Chinese Residents

72.8%

Desire to improve hygiene environment

67.5%

Desire to increase and enhance facilities

The survey indicates that the public places high importance on the cleanliness of public restrooms and the completeness of facilities.

*The user survey conducted by AiMedia Data Center and official platforms.

PROGRAMME OVERVIEW

Over the past 20 years, SVAVO has been dedicated to the research and development of public health products. Based on a rich product portfolio, we adhere to the design philosophy of "people-oriented". Through professional configuration of intelligent restroom products and standards for consumables, we enhance restroom management and the operational efficiency of various terminal devices, creating healthier, safer, and more efficient public hygiene spaces. SVAVO's intelligent touchless restrooms contribute to the improvement of preventive public health and epidemic prevention systems, while reducing operational costs and enhancing user experience.

Commercial Terminals

Value Realization

1. Clean, hygienic, convenient, and efficient public space experience.
2. A good restroom image helps optimize the business environment and create a favorable development environment.
3. Reduce waste and complaints.
4. Innovative operation and maintenance management help reduce costs and increase efficiency.

Municipal Engineering

Value Realization

1. Clean, hygienic, convenient, and efficient public space experience.
2. Full "zero-touch" operation: Constructing sanitary safety guarantees reducing users' concerns about hygiene safety.
3. Promote low-carbon living: Effectively save water by more than 30% paper consumption reduced by more than 50%.
4. Enhance urban image: Promote the Toilet Revolution and improve the city's appearance.

According to a 2012 survey by the World Health Organization

***For every additional \$1.00 invested in sanitation facilities there is a return of \$5.50 in reduced medical costs, increased productivity, and decreased mortality rates.**

1\$    **5.5\$**

SCENARIO PRESENTATION

at a Time for Safety and Hygiene

Sensor faucet

Hands-free operation for added safety

Sensor soap dispenser (handwashing)

Hands-free operation, sealed storage, for added safety

Trash Can

Large opening, wall-mountable

Enjoy a more comfortable hand washing and drying experience

- Effectively eliminates 99% of restroom odors
- Convenient sensor-based water and soap dispensing systems ensure safe and hygienic paper towel dispensing
- With two hands-free drying options Enjoy what you desire, helping you wash and dry your hands with ease

Sensor soap dispenser (toilet seat disinfection)

Touch-free operation, sealed storage for enhanced safety

Sensor paper dispenser

Adjustable length according to needs for safety and hygiene

Toilet seat cover paper/holder

Blocks bacteria, disposable water-soluble paper for added safety

Induction flushing valve

Contactless operation, Sensitive response

Smart ladies' hygiene box

No-touch operation for enhanced safety

SCENARIO PRESENTATION

Toilet cubicle

Create a more comfortable and safe private toilet space

Manage every sheet of paper from disposable seat cover paper to sensor paper dispensing systems and then to waste paper management.

Every use, from taking to disposal is ensured with hygiene.

SCENARIO PRESENTATION

Accessible Restroom

Caring for those in need of convenience

- Convenient and rational product layout design
- Touchless and convenient handwashing and drying experience
- Scientific and hygienic hand-drying methods

We provide corresponding supporting facilities throughout the process according to standards, yet exceed standards to enhance the comfort and sense of security in public spaces.

SCENARIO PRESENTATION

Customized Restrooms

Incorporate surprises into daily life

Based on popular products integrate new color schemes, graphics or a new font present a fresh visual experience.

INDUSTRY APPLICATION

Commercial Complex

The restroom is one of the most frequented spaces in shopping centers.

Every service detail within its space will become a key point driving customer flow.

It directly influences consumers' level of affection for a shopping mall and even determines whether they will visit again next time.

"Smart" handwashing experience at the sink

The process includes water dispensing, soap dispensing, hand drying, and disinfection, ensuring hands stay clean without contact, with guaranteed safety.

"Touchless" protection inside the toilet cubicle

Take disposable seat cover paper-use touchless soap dispenser-disinfect hands, take toilet paper without contact, dispose waste into touchless trash bin.

INDUSTRY APPLICATION

Commercial Office Building

Most people spend 90% of their day indoors, with a significant portion of that time being in the office.

Creating a healthy work environment is especially important for users as it can increase employee dedication, reduce illness-related absences, and effectively enhance productivity. This also reflects care for employees.

INDUSTRY APPLICATION

Municipal Engineering

For various scenarios such as government agencies, parks, airports, train stations and highway service areas, stadiums, libraries, etc., we offer different series and specifications of products to provide efficient and cost-saving sanitation solutions.

INDUSTRY APPLICATION

Hospital

Hospitals are places with strict requirements for disinfection and isolation. Our solutions must reduce the risk of cross-infection and provide efficient, skin-friendly cleaning to establish a restroom that complies with regulations.

INDUSTRY APPLICATION

Food And Beverage Hotels

A clean and tidy restroom is crucial for enhancing overall customer satisfaction with your dining experience.

SVAVO

SVAVO SMART APP PART 2 solution

PRODUCT ADVANTAGES

Equipment Integration and Control

SVAVO Smart supports a wide range of intelligent cleaning equipment and systems, such as smart aroma diffusers smart toilet paper dispensers, etc. Users can centrally control and manage all devices through a unified interface.

Multi-space configuration

Support for managing multiple spaces (or projects) with multi-level configuration (e.g., building - floor - room home - room - area, etc.).

Collaborative management by multiple individuals

When there are numerous projects or smart devices, users can invite other members to participate in management and device maintenance collectively.

Consumable inventory tracking

SVAVO Smart provides consumable tracking and management functions. Users can view real-time data on the usage of consumables for each device, optimizing consumable usage and saving costs.

Smart Task Push

When the device triggers low battery, low liquid levels, or other warning thresholds, it will immediately report to the cloud and send push notifications to the mobile app, reminding users to replace or refill consumables. This enhances work efficiency and reduces operational costs.

Online OTA Upgrade

Remote Over-the-Air (OTA) upgrades, multi-threaded airborne upgrades, significantly reduce operational costs and effectively reduce failure rates.

SVAVO**MOBILE SANITIZING
STATION****PART 2** Solution

As a pioneer in urban public services, SVAVO has been exploring intelligent cleaning products for cleanliness, health, sustainability, and promoting a better way of life. Among them, the SVAVO Mobile Disinfection Station is designed for hand disinfection in public places, providing convenient and efficient hand sanitization to safeguard health with "one hand".

Hygiene Station

CURRENT SITUATION OBSERVATION

Everyone is responsible for their own health. In public places, it is important to continue wearing masks, practice hand hygiene, and observe coughing and sneezing etiquette. The SVAVO Mobile Disinfection Station emphasizes prevention as the primary measure, combining prevention with treatment and continuously enhancing public awareness of prevention and self-protection.

Solution Overview

SVAVO Mobile Disinfection Station actively implements hand hygiene measures with its touchless design, specifically designed for hand disinfection in public spaces, ensuring public safety at all times.

Equipped with a 600ml-1200ml disinfectant container, a single refill can provide hand disinfection for thousands of people, offering users a convenient, comfortable, and hygienic experience with touchless dispensing.

The deployment of the SVAVO Mobile Disinfection Station is simple and user-friendly, featuring an independent stand for flexible placement wherever needed. It can be strategically placed in high-density and high-traffic areas such as supermarkets, hospitals, schools, and transportation hubs, including entrances, waiting areas, elevator lobbies, and reception desks, effectively meeting the hand disinfection needs of the public and alleviating concerns about going out.

SVAVO

PLAZA SERIES PART 3

Softness is the essence, with smooth and rounded lines running through the design from beginning to end. Discarding intricate patterns, color choices focus on the ultimate white or pure black, seamlessly integrating the product with the space, bringing a sense of modernity, simplicity, fashion, and agility to the environment.

Hand Dryer

PL-151076

Optional consumable:
HEPA filter P-HF001

White Titanium Grey (Custom) Black (Custom)

Product Parameters

SIMPLICITY SERIES PART 3

Simple Space · Pure

Actively advancing the toilet revolution to see practical results.

Assisting partners in creating more comfortable public sanitation spaces.

We hope to create a simpler, fresher, and cleaner restroom experience by breaking through traditional design considerations for public sanitation spaces. The Simplicity series will redefine visual cleanliness with its minimalist white, sleek appearance, and outstanding functionality.

WATERFALL SERIES PART 3

The designer drew inspiration from cascading waterfalls incorporating the clean and straight vertical lines into the product design, shaping a clear and transparent concept of public sanitation space culture. The products complement each other, forming a complete public space cleaning solution. Bright colors are used to create a unique spatial style, while attention to detail provides people with comfort and convenience.

SVAVO

0 SERIES PART 3

Breaking conventions, continuing classics, the 0 series fully interprets the aesthetic achievement of simplicity and lightness. Following the principle of simplicity, with a design style that tames complexity, it redefines the minimalist fashion doctrine. Opening up numerous possibilities for smart living, accumulating the power of "quantitative change" and manifesting the realm of "qualitative change."

SVAVO

HAND DRYER PART 4

SVAVO hand dryers provide an efficient and hygienic drying method. Compared to traditional paper towels for hand wiping, using SVAVO hand dryers effectively reduces carbon dioxide emissions, aligning more with global environmental conservation ideals. As a proponent of low-carbon environmental practices SVAVO has been advocating for green development and energy conservation.

Hand Dryer

V-185.01 comes in both brushed motor and brushless motor variants

SVAVO

AUTOMATIC SOAP DISPENSER PART 4

Whether now or in the future, we coexist with bacteria and viruses in the same world. Learning the correct hand disinfection and cleaning practices is one of the most basic measures to prevent infection by pathogens. SVAVO's sensor soap dispenser is designed to be user-friendly and touch-free, promoting hygienic use and significantly reducing the risk of cross-contamination thereby promoting proper hand disinfection practices.

It is suitable for public hygiene spaces in various application scenarios such as hotels, restaurants, commercial offices, schools, hospitals, and transportation hubs.

Aroma Diffuser V-AD006(Commercial)

Operating Voltage: 12V	Weight: 7.05kg
Power: 6W	Material: aluminum
Dimensions: L300*W150*H360mm	Coverage Area: 5000m ³
Essential Oil Bottle: 1000ml	
Usage: Can be used separately (placed flat or wall-mounted) or connected to the air conditioning system	

Aroma Diffuser V-A5000(Commercial)

Operating Voltage: 12V	Weight: 4.45kg
Power: 25W	Material: aluminum
Dimensions: L253*W143*H165mm	Coverage Area: 4000-5000m ³
Essential Oil Bottle: 12.5L*2	
Usage: Can be used separately (placed flat or wall-mounted) or connected to the air conditioning system	

SVAVO

TISSUE BOX PART 4

SVAVO designers are adept at capturing the tiny details of life, leveraging SVAVO manufacturing charm from a humanized perspective. SVAVO tissue boxes, in terms of appearance design, functional attributes, and attention to detail, consistently maintain an innovative spirit that keeps pace with the times, continuously meeting the changing needs of public spaces.

SENSOR FLUSH SYSTEM

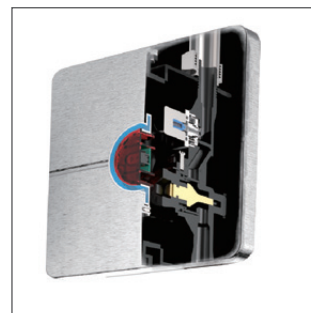

To conserve limited freshwater resources, coastal port cities and island nations have opted for seawater flushing toilets. However, the high salt content in seawater poses a significant threat to flushing systems. SVAVO has innovatively developed a seawater flushing toilet system. It adopts pulse-type solenoid valves with ultra-low power consumption and strong stability. The plastic valve body is resistant to high pressure and corrosion, making it impervious to seawater erosion. UV surface treatment effectively prevents corrosion and green rust issues inside the toilet. With this powerful water-saving flushing system, we embark on a new era of intelligent and clean living.

Creative Seawater Flush Toilet System

Powerful and water-saving flushing force opens up a brand new era of intelligent and clean living

- 01.Utilizes pulse-type solenoid valves with ultra-low power consumption and high stability.
- 02.Plastic valve body and high-hardness plastic water pipes are resistant to seawater erosion.
- 03.UV surface treatment effectively prevents the green rust problem caused by toilet corrosion.
- 04.Precision chip control, resistant to strong light interference, sensitive and accurate.
- 05.Embedded sensor for real-time data collection and reporting of water usage.
- 06.Supports water flow adjustment, with automatic sensing flushing/manual button, offering two flushing modes to choose from.

6S STANDARD PART 5

- Restaurants, clubs, and similar service-oriented venues.
- Shopping malls, tourist attractions, and other high-traffic public areas.
- Office restrooms following the 6S standard.
- School, factory, and other facility restrooms adhering to the 6S standard.
- Hospital restrooms conforming to the 6S standard
- Public restrooms in urban areas and tourist spots
- Budget hotels

Clean Experience, Within a Square Inch Smart Devices Elevating Quality of Life

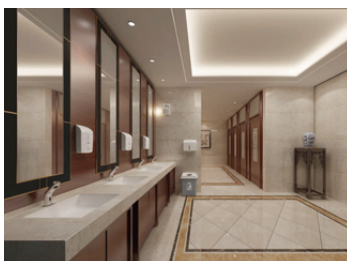

Restaurants, clubs, and similar service-oriented establishments

Commercial and other public spaces

Schools, factories, and other enclosed facilities

Urban planning public spaces

Office building public spaces

Hospital service-oriented spaces

6S standard basic configuration is as follows:

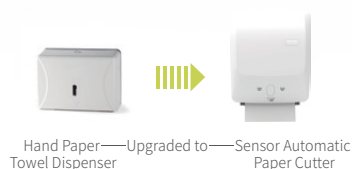

- ① Hand paper towel box (thousand sheets), including paper-saving and environmental protection guidance warning stickers, or dry hand phone usage instructions.
- ② Public area trash can.
- ③ Toilet paper box, including paper-saving and environmental protection guidance warning stickers.
- ④ Soap dispenser (for hand sanitizer), including usage instructions.
- ⑤ If there is a toilet, there should be a toilet seat disinfection and cleaning setup, with multiple options.
- ⑥ Sensor faucet. Install water-saving devices and adjust the water flow to be gentle to avoid splashing; usage instructions should be provided on stickers.
- ⑦ Flushing device:
 - A. Toilets (squat toilets) and urinals in men's restrooms with sensor flushing need to have instructions for use marked ensuring proper operation of the equipment and conducting water-saving adjustments.
 - B. Sensor flushing devices should have an emergency repair phone number, and a "Under Maintenance" warning sign (placard) should be placed during repair operations.
- ⑧ Mobile phone shelf with reminders to prevent forgetting.
- ⑨ Coat hooks.
- ⑩ Trash can for toilet paper in men's restrooms (with garbage bags). The setup of toilet paper trash cans in restrooms should be gradually phased out to reduce sources of contamination in the restroom. Replace with degradable tissues and prompt flushing after use. Women's restrooms should have dedicated trash cans for sanitary pads.
- ⑪ Fragrance and environmental disinfection machine (placed at a high position to avoid spraying the nose and mouth, with usage frequency labels and prompts for cleaning personnel to replace them).
- ⑫ Accessible Restroom: Businesses with conditions can set up independent restrooms for use by disabled, women, and infant groups. (Accessible Restroom) or add additional functional settings in public restroom areas.
- ⑬ Tool rooms should be organized according to standardized classifications, with clear and standardized product labels, and complete signage. The 6S standard action confirmation form for restrooms should be clearly displayed and subject to supervision and inspection.

Convert to Public Restroom

1.Improved Layout and Renovation

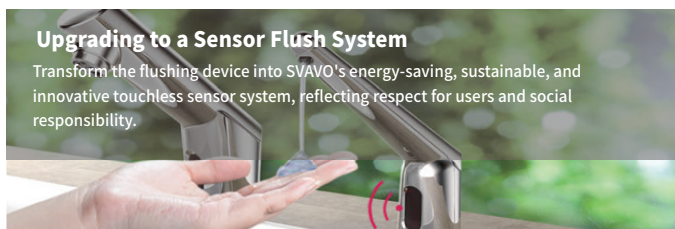

Sensor Automatic Paper Cutter

Introducing the SVAVO PL-151064 Sensor Automatic Paper Cutter as a replacement for the current hand paper towel setup will offer a more upscale and enjoyable hand-drying experience.

Upgrading to a Sensor Flush System

Transform the flushing device into SVAVO's energy-saving, sustainable, and innovative touchless sensor system, reflecting respect for users and social responsibility.

Induction flushing system

Transforming the flushing device into a SVAVO energy-saving, sustainable, and innovative contactless sensing device reflects respect for users and social responsibility.

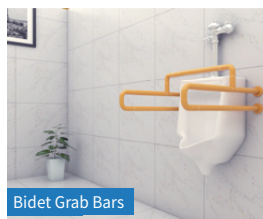

Hand Drying Upgrade

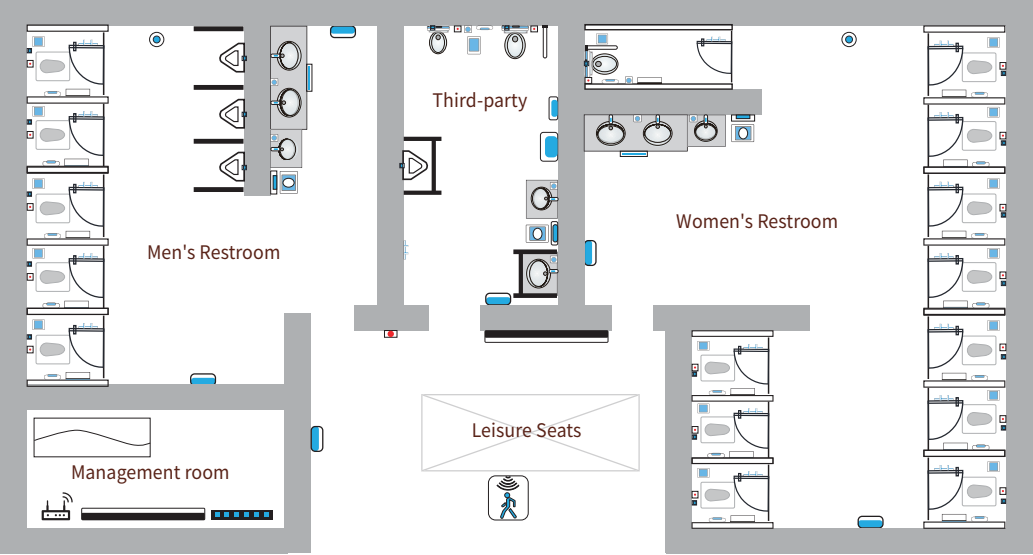

Replace traditional slow hand dryers with the SVAVO PL-151070 high-speed hand dryer, featuring rapid airflow that dries hands in just 10 seconds.

2.Overlooked Groups

To enhance the restroom experience for various groups without setting up separate third restrooms, adding some facilities for the disabled and infants on the existing basis will satisfy the needs of special groups and leave a lasting impression.
